Supplementary Figure 1: Supplementary figure related to Figure 6. Kaplan-Meier survival plots for patients with (A) *TP53* WT and (B) Mut colorectal cancer to determine the effects of selected genes other than *NCOA3*, *HOXA1*, *FOLR1*, *SOCS1*, and *PIK4CA* selected by shRNA library screening and database analysis on survival. Log rank tests were used for statistical analysis ($p < 0.05$). Red and black line, ActD-sensitive genes; blue and black line, ActD-resistant genes.
